గమనిక: క్రింద ఇవ్వబడిన సమాచారం ఆధారంగా Q. 11 నుండి Q. 15 ప్రశ్నలకు సమాధానాలను వ్రాయండి.

The mansion of Ebenezer Storer, an extensive edifice of wood three stories in height, was erected in 1700. It was situated on Sudbury Street between two trees of great size and antiquity. An old English elm of uncommon height and circumference grew in the sidewalk of the street before the mansion, and behind it was a sycamore tree of almost equal age and dimensions. It fronted to the south with one end toward the street. From the gate a broad walk of red sandstone separated it from a grass-plot which formed the courtyard, and passed the front door to the office of Mr. Storer. The vestibule of the house, from which a staircase ascended, opened on either side into the dining and drawing rooms. Both had windows towards the courtyard and also opened by glazed doors into a garden behind the house.

ఎబెనెజర్ స్టోర్ యొక్క భవనం, మూడు అంతస్తుల చెక్కతో కూడిన విస్తారమైన భవనం, 1700 లో నిర్మించబడింది. ఇది సడబరీ స్ట్రీట్ లో రెండు పెద్ద పురాతన చెట్ల మధ్య ఉంది. భవనం ముందు వీధి కాలిబాటలో అసాధారణమైన ఎత్తు మరియు చుట్టుకొలత కలిగిన పాత ఆంగ్ల ఎల్మ్ చెట్లు పెరిగాయి మరియు దాని వెనుక దాదాపు సమాన వయస్సు మరియు కొలతలు కలిగిన ఒక తాప చెట్టు వీధి చివర దక్షిణం వైపుగా వంగింది. గేట్ నుండి ఎర్ర ఇసుకరాయితో కూడిన విశాలమైన నడక బాట. గడ్డి పెరడును దాటి, మిస్టర్ స్టోర్ కార్యాలయ ముందు తలుపును చేర్చుతాయి. ఇంటి వసారా ప్రకరణ నుండి మెట్లు మొదలై డైనింగ్ మరియు డ్రాయింగ్ రూమ్ లోకి ఇరువైపులా చేర్చుతాయి. రెండింటికి పెరడువైపు కిటికీలు ఉన్నాయి. నగిషీ తలుపులు ద్వారా ఇంటి వెనుక ఉన్న తోటలోకి ప్రవేశం ఉంది.

**Passage (146-150)**

Peace psychology came of age in the latter half of the 20th century and is understood most clearly when situated in the context of World Wars I & II as well as the Cold War. Peace psychology began to take root after the end of the cold war, its goal to “increase and apply psychological knowledge in the pursuit of peace including both the absence of destructive conflict and the creation of positive social conditions which minimize destructiveness and promote human well-being. One of the earliest psychologists, William James, who has since been referred to as the first peace psychologist, shed light on some of these nuances, namely the psychological dimensions of war, blind nationalism, imperialism and war fever, state-sanctioned violence, and public support of hostility. The American Psychological Association began to probe the effects of threats of atomic warfare as well as the potential psychological effects on populations experiencing atomic bombardment. Dissent began to emerge within the psychological establishment with Gordon Allport, Hadley Cantril, and Otto Klineberg began to push for peace, arguing that the atmosphere of the era of nuclear warfare called a new form of diplomacy and the abolition of war. Peace psychologists began to revisit the notion of ‘Realpolitik’: the belief that politics is reducible to three basic goals: keeping power, increasing power, and demonstrating power which was theorized in 1972, in order to analyse power dynamics behind violence and non-violence, war and peace. A culmination of ideas and theories that lie at the intersection of cross-cultural psychology, positive psychology, and social psychology, Peace psychology draws from the observations made in neighbouring fields of psychology, applying them to analyses of peace, war, conflict, violence, and non-violence. It aims to prevent and mitigate direct and structural violence, promoting conflict resolution and the pursuit of socially just ends. Peace psychology centres around a four-fold model that focuses on the nuances of direct Violence, structural violence, peace-making and peace building. *Direct violence* is an episodic and acute manifestation of violence. It is the overt harm meted out to people, killing, injuring the physical being instantly and dramatically. Structural violence is endemic to economic systems that produce a concentration of wealth for some while exploiting others, hierarchical social systems that are suffused with intolerance. Peace-making focuses on prevention of violent episodes by using procedures that encourage dialogue, empathy, and win/win outcomes. Peace-building entails preventing and mitigating episodes of destructive conflict and violence and the active pursuit of social justice. Peacebuilding includes proactive behaviours such as defunding violent systemic manifestations of structural violence like the police and addressing structural inequalities that are/have been the antecedents of violent episodes and conflict.
